[[Lab Title]]

[[U0 / S0.3]]

PREP — [[WHEN]]

WHEN	TASK	DETAIL
[[Night before]]	[[Make solutions]]	[[Exact recipe: g of solid, to what final volume, in what vessel.]]
[[Morning of]]	[[Load trays]]	[[Per-group count × number of groups = total.]]
[[Before 1st period]]	[[Room setup]]	[[Where the shared stations go, what is out on the bench.]]

Materials — total for [[N]] groups across [[N]] periods

[[Item × count]] · [[Item × count]] · [[Reagent, total volume needed]]

TIMING — 50-MINUTE PERIOD

MIN	PHASE	WATCH FOR
[[0–5]]	[[Pre-lab check, tray out]]	[[ ]]
[[5–15]]	[[Part A/B]]	[[ ]]
[[15–35]]	[[Part C running, D in parallel]]	[[ ]]
[[35–45]]	[[Finish, record]]	[[ ]]
[[45–50]]	Cleanup, goggles off last	[[ ]]

FAILURE POINTS

- **[[The mistake.]]** [[Why it happens and what it does to their numbers.]] [[What you say or do.]]
- **[[The mistake.]]** [[Fix.]]
- **[[The mistake.]]** [[Fix.]]

EXPECTED RESULTS

[[The realistic range, not the ideal number. State what a good group gets and what a sloppy-but-passing group gets, so partial credit decisions are consistent.]]

QUANTITY	ACCEPTED	TYPICAL STUDENT RANGE
[[ ]]	[[ ]]	[[ ]]
[[ ]]	[[ ]]	[[ ]]

SAFETY + DISPOSAL — VERIFIED

- [[Hazard]] — verified against [[SDS / district policy]] on [[date]].
- [[Disposal route]] — verified. [[Limit and why this waste is under it.]]
- Alconox cleanup block is the standing default and needs no per-lab check.

PRE-LAB KEY

1. [[Question stem, abbreviated.]] [[Answer. Note the wording you will and will not accept.]]
2. [[stem]] [[answer]]
3. [[stem]] [[answer]]
4. [[stem]] [[answer]]
5. [[stem]] [[answer]]
6. [[stem]] [[answer]]
7. [[stem]] [[answer]]
8. [[stem]] [[answer]]
9. [[Data tables drawn]] [[Full credit = tables drawn in ink with units in the row labels.]]

POST-LAB KEY

1. [[stem]] [[Full answer, plus the common wrong answer and whether it earns partial credit.]]
2. [[stem]] [[Worked calculation, every step, units carried. Percent error shown.]]
3. [[stem]] [[answer]]
4. [[stem]] [[answer]]
5. [[stem]] [[answer]]
6. [[stem]] [[answer]]

GRADING

[[Point split across pre-lab / data / post-lab. Carbonless copy is graded individually.]]

[[Any lab-specific scoring rule — e.g. −1 point per misidentified unknown out of 11.]]

MISSED LAB

If the setup is already torn down, the student completes a Missed Lab Analysis rather than the class re-running the lab. [[Name the data set you hand them — a real class data table from this period — and which post-lab questions they still answer.]]
