Handwriting font sheet

Sentences. Copy each line once, left to right, in your normal flow, letters joined the way you really join them, at your usual speed. Keep your natural slant and spacing. Do not slow down to make it neat. The last line is yours: write what you would really write on a key. The same dark pen or soft pencil as pages 1 to 3.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

Sphinx of black quartz, judge my vow.

Sphinx of black quartz, judge my row

Step 1: convert grams to moles. Step 2: multiply by 6.022 x 10 to the 23rd.

Step 1: convert grams to moles. Step 2: multiply by 6.022×10^{23}

Subtract 4 from both sides, then divide both sides by 2, so x = 1.

Subtract 4 from both sides, then divide both sides by 2, so $x = 1$.

Net force equals mass times acceleration: F = ma = (4.0 kg)(2.0 m/s) = 8.0 N.

Net Force equals mass × acceleration: $\vec{F} = m\vec{a} = (4.0kg)(2.0m/s) = 8.0N$

The mole cancels, molecules remain. 1s 2s 2p 3s 3p, six valence electrons.

The mole cancels, molecules remain. 1s 2s 2p 3s 3p, six valence electrons.

Kinetic energy, momentum, velocity, wavelength, frequency, equilibrium, isotope.

kinetic energy, momentum, velocity, wavelength, frequency, equilibrium.

Now write anything you would normally put on a key: your usual shorthand and abbreviations.

$\vec{\Sigma F} = m\vec{a}$, $x^2 = 4x$, $92 = 37x + (4x+9)$, $V_f^2 = V_i^2 + 2ad$, moles

Handwriting font sheet

Write each character **once** in its box, sitting on the solid blue line, in **dark pen or a dark soft pencil** (2B or softer), at the size you would write on an answer key. Write naturally. Do not trace and do not touch the box edges. Letters with tails (g j p q y) hang below the line. Where a box says "again," write it a second time the way it comes out naturally, not copied from the first. Keep the four black corner squares clear. Scan flat at 300 dpi, or photograph straight down in even light with no shadows.
