Dinosaur Poster or Slide

NAME | DATE | PERIOD | SCORE / 20

THE JOB

Make a colored infographic about one Mesozoic dinosaur, either a paper poster or one Google Slide.

OUTLINE · POSTER OR SLIDE

NAME HEADER your dinosaur's name, big

MESOZOIC TIMELINE mark when your dinosaur lived (mya means million years ago)

TRIASSIC 252 to 201 mya	JURASSIC 201 to 145 mya	CRETACEOUS 145 to 66 mya

DRAWING
your dinosaur, big. Tracing is fine.

ABOUT MY DINOSAUR
period · hip type · diet · habitat · walks on · size · special feature · fossils found in

MAP OF EARTH BACK THEN
continents where they were, with a dot on each fossil site

• fossil site

Solid teal border: facts. Dashed black border: pictures. Where the zones sit is up to you.

WHAT IT NEEDS

1. **Name header.** Big and easy to read.
2. **Mesozoic timeline.** All three periods with their dates. Mark when your dinosaur lived.
3. **Drawing.** Big. Tracing is fine.
4. **About My Dinosaur.** One answer for each fact below.
5. **Map.** Earth when your dinosaur lived, not today's map. A dot on every fossil site, and a key for the dots.
6. **Color.** A poster colored all over, or a slide in your own color scheme.

FACT	WHAT TO PUT
Period	Early, Middle, or Late, plus Triassic, Jurassic, or Cretaceous. For example, Late Jurassic.
Hip type	**Lizard-hipped (saurischian):** in most of them, the pubis hip bone points forward, like a lizard's. *T. rex*, *Velociraptor*, and the long-necked plant-eaters are in this group. **Bird-hipped (ornithischian):** the pubis points backward, like a bird's. All of them ate plants, like *Stegosaurus* and *Triceratops*. The names are backwards from what you'd guess: birds come from the lizard-hipped group.
Diet	carnivore (meat), herbivore (plants), omnivore (both), or fish-eater
Habitat	forest, river floodplain, coastal plain, swamp or wetland, desert dunes, or open woodland
Walks on	2 legs, 4 legs, or both
Size	length in meters, next to a school bus (about 12 m). A 24 m dinosaur is about 2 buses long.
Special feature	horns, frill, armor, plates or spikes, claws, crest, feathers, speed, or size
Fossils found in	every country or state where its fossils have been found, not just one. Each one becomes a dot on your map.

Pick any Mesozoic dinosaur and look up its facts. Pterosaurs, plesiosaurs, ichthyosaurs, and mosasaurs don't count.

Format, Plan, and Rubric

PICK YOUR FORMAT

Both formats are graded with the same rubric.

POSTER

Paper, in color all over.

Readable from across the room.

A printed map of Earth back then can be glued on, but you add the fossil dots and the key.

ONE GOOGLE SLIDE All 5 outline zones on one slide, set up like the outline. Turn it in on Google Classroom.

- Your own color scheme: 2 or 3 colors that go together. Don't leave the white default or a Slides theme as is.
- Your own words. Don't copy and paste any text.
- Draw the dinosaur yourself, with Slides shapes and lines, a drawing app, or on paper with a photo of it added. Tracing is fine. A pasted photo of a dinosaur doesn't count.
- A map image of Earth back then is fine, but you add the fossil dots and the key.
- Any image you didn't make gets its source in small text on the slide.

MY PLAN

My dinosaur _____ **Period** _____

Hip type _____ **My format (circle one): Poster / Google Slide**

Fossils found in (every country or state) _____

Where I got my facts and picture (website or book) _____

RUBRIC · 20 POINTS

PART	FULL CREDIT	PARTIAL	LITTLE OR NONE	SCORE
Name header 2 points	2. Dinosaur's name across the top, spelled right and big enough to read from across the room (poster) or when projected (slide).	1. Name is there but small or misspelled.	0. No name.	
Timeline 3 points	3. Triassic, Jurassic, and Cretaceous with their dates. When your dinosaur lived is marked in the right period.	1 to 2. A period or its dates are missing, or the mark is in the wrong place.	0. No timeline.	
Drawing 3 points	3. A big, clear drawing of your dinosaur, drawn or traced by you. A pasted photo doesn't count.	1 to 2. Small, unfinished, or hard to tell what it is.	0. No drawing, or only a pasted photo.	
About My Dinosaur 5 points	5. All 8 facts, and they're correct: period, hip type, diet, habitat, walks on, size compared with a school bus, special feature, fossils found in.	2 to 4. Some facts are missing or wrong.	0 to 1. One or two facts, or none.	
Map & fossil dots 4 points	4. Earth when your dinosaur lived, not today's map. A dot on each place its fossils were found, and a key for the dots.	2 to 3. Today's map, or dots missing or in the wrong places.	0 to 1. No map, or a map with no dots.	
Clear, visual, color 3 points	3. Pictures and short labels in your own words, no paragraphs. Poster: colored all over. Slide: your own color scheme and design, with image sources listed.	1 to 2. Too much writing, only parts colored, a Slides theme left as is, or some text pasted.	0. Mostly paragraphs, mostly black and white, or mostly pasted from the internet.	

TOTAL _____ **/ 20**
